

# Stomacher® 80 Biomaster series

## Small tissue processing solutions for clinical and life science microbiology

The **Stomacher® 80 Biomaster** and **Stomacher® 80 microBiomaster** provide small tissue processing solutions for clinical, life science and microbiology applications. Capable of processing samples from 250ul to 80ml, the Biomaster range caters for the increased demand for smaller samples without reducing sample quality.

The **Stomacher® 80 Biomaster** (5ml to 80ml sample capacity), and **Stomacher® Bags** allow samples to be processed safely and without risk of cross contamination while maximising visible cell recovery. Tens of thousands of referenced methods are available and now with the enhanced

sample capacity range of the microBiomaster (250ul to 80ml sample capacity) the **Stomacher® 80** is the World's most efficient and versatile sample preparation system for life science applications.

Choose the **Stomacher® 80 microBiomaster** (250ul to 80ml sample capacity) for increased sampling volume range and adjustable process times & paddle speeds.

### Why the Stomacher® 80?

Adjustable process times  
& paddle speeds

Proven enhancement in  
cell recovery & viability

No risk of cross  
contamination

Process samples  
from 250ul - 80ml

Cost effective sample  
preparation
